

Quebec Daycare sets up state of the art Toddler Gym and Computer/Audio Centre

A daycare in Quebec has realized the importance of getting our young toddlers and preschoolers interested in fitness at an early age and has extended their facility to incorporate a fun indoor gym using the GymKids fitness equipment.

The gym also has soft play areas, computer dance mats, ball pits and tunneling structures which allows the children to play and challenge themselves physically.

Their computer and audio centre is state of the art, and the children in the daycare are being given the right start and opportunities which will help to stimulate and develop both their mind and their bodies.
